Kunj Parekh	202001223
Naman Patel	202001236

We implemented almost all of the functionalities specified in the SRS document. Yet, still there are some future works which could be implemented in the project as mentioned below:

Future Works & Open Issues

- **More Robust Authentication**
Implementing Mail and Aadhar Card Based Authentication
- **Reminder System For Buyer**
The buyer gets a notification when his period of renting a product is reaching an end.
- **Payment Gateway**
Support for direct payment on the website, thus benefiting from the ease of use and business point of view.
- **Product specific Request to Seller Details**
In the current version of the website, Seller is unable to view for which product is the Request sent.
- **Chat with Seller**
In the more advanced version, directly chatting with the seller on the website will help in increasing activity on the website.
- **Seller Details**
Send other details like the Contact number for easy communication between buyer and seller.
